ABOUT OPTIMIZED

Optimized Solutions International is a global professional services organization providing business enterprise solutions to clients for over 20 years. A pioneer in applying innovative, technology-based solutions to common business problems, Optimized Solutions is headquartered in Chicago, Illinois with offices in Boston & India.

GOODS AUTOMATION FAQS

What is the mechanism that GR Automation uses to receive information into the system?

We configure and customize various IoT Devices and cameras installed at the entry points for data collection.

Where are the cameras placed and what kind of devices are used?

We use client-procured Autofocus cameras along with standard IoT devices* that are installed strategically at the real, touch points throughout the plant from where data needs to be collected.

*Optimized Solutions can recommend the hardware devices, like IoT devices & cameras, required for the GR Automation solution. These devices are strategically installed at the real data collection points of the plant.

How does the camera recognize the goods being received and where it's placed?

The camera captures pictures and converts to machine readable formats to enable further processing.

How would GRA differentiate between different kind of products from different vendors.

GRA processes labels and barcodes from goods labels and takes it for further processing
